Objectives:

The main objective of this meeting is to reflect upon the findings of the work carried out during the Workstream on “Social innovation in cities” under the main questions:

- What can cities do?
- How they can grasp our findings?
- How we could make them actionable by city leaders, civil servants and stakeholders in general?

We will also try and feel in “cities' shoes” in order to provide the most suitable messages. In particular, the meeting will:

- Exchange the findings, main evidence and messages from the chat sessions
- Share the two cities visited (in-depth case studies)
- Open up the discussion on needs, main values, challenges, trends, and key messages to cities
- Discuss the potential of URBACT to support such approaches
